

# Smarter data for smarter manufacturing.

---

We help take your structured business data and integrate it with your machines on the factory floor to help you make better decisions. We build the data bridges necessary to connect how what happens in your plant affects the business and vice versa. Let's capture and analyze raw data from your machines, processes and operations and turn it into intelligent information you can use to save time and money, while improving quality.

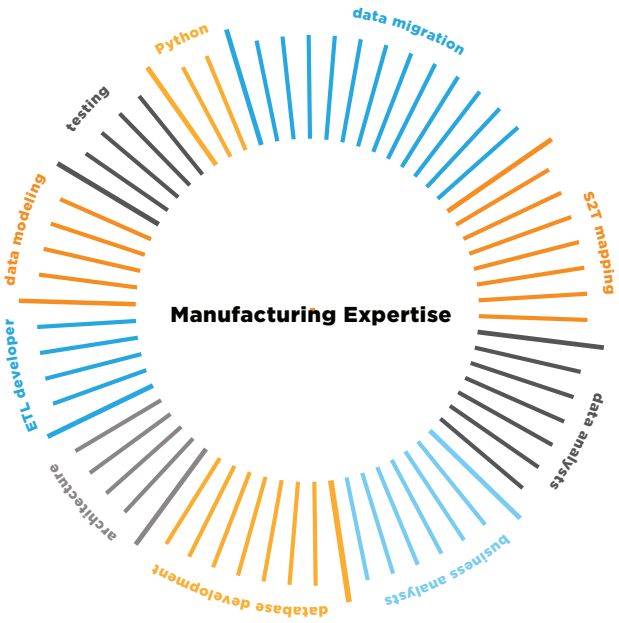

## MANUFACTURING EXPERTISE

- Integrate data with CRM, shipping and other systems.
- Project leadership and management.
- Data modeling.
- Problem resolution in existing databases and spreadsheets.
- Upgrading spreadsheets to databases.
- Product master data management.

## About Us

Superior Data Strategies is a data consulting firm focused on assisting clients with building strategic plans and implementing tactical projects that advance their data-related business objectives.

Our experienced team of highly productive data architects, analysts and developers can take on any data management challenge standing between an organization and its tactical and strategic goals. No matter the project, we function as an extension of our clients' teams, achieving better business data solutions together.

Superior Data Strategies helps optimize your business. We strive to put data in the hands of the people who need it most so you can make the best possible decisions. We'll expertly analyze your raw data, and work with you to make sense of it all, collaborating to turn that raw data in customized, relevant and actionable business information you can actually see. What Google analytics does for your website, SDS can do for your business data.
