Turn spreadsheets into streamlined data collection processes.

We know school administrators feel the pressure to maintain good information about their schools. And the demand to keep up with the sheer amount of information is challenging. SDS provides the data tools to allow schools to stay focused on students and put to rest the worry associated with state regulations. We'll help reduce inefficiencies and improve cost containment through establishing best practices for collecting and maintaining your critical data.

DATA MANAGEMENT SERVICES TAILORED TO SCHOOLS

- Assessment of current practices, including:
  - o Master data collection and management techniques
  - o Data collection tools
  - o Data quality

- Establish best data practices.

- Build custom solutions for data collection and reporting.

- Assist with the implementation and data population of software packages.

- Design and build data warehouse solutions.

- Take information from multiple sources, giving administrators the ability to examine data and compare it to statewide data.

superiordatastrategies

• Built a data warehouse for focus group purposes consisting of Michigan school test scores and individual student and teacher performance.

• Expert-level understanding of State of Michigan data formats and requirements.

• Deep experience with taking nonstandardized Excel sheets and conforming them into a central database.

• Empathy for the struggle school administrators experience to maintain quality, up-to-date data about their schools in a dynamic and under-resourced environment.

We're here to help reduce costs, lessen stress and make data collection and reporting a normal business operation.

About Us

Superior Data Strategies is a data consulting firm focused on assisting clients with building strategic plans and implementing tactical projects that advance their data-related business objectives.

Our experienced team of highly productive data architects, analysts and developers can take on any data management challenge standing between an organization and its tactical and strategic goals. No matter the project, we function as an extension of our clients' teams, achieving better business data solutions together.

Superior Data Strategies helps optimize your business. We strive to put data in the hands of the people who need it most so you can make the best possible decisions. We'll expertly analyze your raw data and work with you to make sense of it all, collaborating to turn that raw data into customized, relevant and actionable business information you can actually see. What Google analytics does for your website, SDS can do for your business data.
